—Hornberger’s 1939 Spring Special Offers—

HORNBERGER’S  
*Half Price Special Offers*

BULB SIZES: READ BEFORE ORDERING

Gladiolus bulbs (or corms) are graded into six, and sometimes seven separate sizes or grades, the largest are one and one half inches, and over in diameter, and grade down to the No. 6-7 sizes which are less than one half inch. We offer large bulbs for this sale, as all bulbs having a diameter of 1 ¼" or larger, the larger bulbs flower first, and as a rule have a little larger spike than a medium size which flowers about ten days later, but often the medium size bulbs have practically as good a spike as from many larger bulbs, in particular "young" vigorous stock such as we grow and sell. Medium sizes are near one inch diameter, a little larger or smaller than one inch, and small bulbs, the No. 5-6 sizes are bulbs smaller than three fourths inch diameter, most of these give spikes good enough for home decoration, and often flower about two weeks later than larger bulbs. Large and Medium bulbs of the best varieties as a rule give good enough spikes for florists' use and for general cut flower sales. By planting all sizes you have a long period of bloom, in the latitude of Buffalo, N. Y. beginning about July 15 up to October 1. Small and medium sizes grow into nice large or medium size bulbs in one growing season, you can plant,—say medium bulbs, harvest fine bloom and dig, practically all large bulbs, with many bulblets or cormels attached. We supply a free mimeographed sheet of general instructions, for all who so request, for the planting and handling of bulbs. Sizes are indicated thus: "L" for large size, "M" for medium size and "S" for small size bulbs.

**ALL COLOR MIXTURE; OUR SPECIAL HALF PRICE OFFER: VALID TO JUNE 1, 1939 ONLY.** This mixture contains most colors offered in named glads, these are mostly good named kinds we grow, in an unlabeled assortment of mixture of many varieties, you get fine blooms at an extra low cost, and do not need to bother with labeling, and keeping many varieties, under separate label. Gladiolus production, like other crops, was very heavy last season, and the prices are lower now than for some time, and we expect they will be much higher next season, so now is the proper time to make your purchases to your decided advantage. We offer this mixture, so low in price that we can not offer it prepaid, so add extra postage, where you cannot call, but must have them mailed. The large bulbs will weigh about 6 lbs. packed, for shipment for each 100 large bulbs; 200 medium will weigh about the same as 100 large, and 300 small will weigh about 3 lbs. packed for shipment, and your mail carrier can tell you the extra postage required. Six lbs. to zone 1-2, 14c; to zone 3 it is 19c and to zone 4 it will cost 21c for postage on six lbs.

Minimum offers at \$1.00 each. If you cannot plant 100 give some to friends.	75 Large bulbs .....	\$1.00
	200 Medium bulbs .....	1.00
	300 Small bulbs .....	1.00

**PICARDY-SPECIAL OFFER:** Valid only until June 1, 1939; at same rates and same conditions as for our ALL COLOR MIXTURE, listed above, this like the Mixture, will only be sold in \$1.00 lots as above, and not prepaid; you must add enough postage, as we cannot prepay at such low prices. They will weigh same as the above mixture.

PICARDY is perhaps one of the most outstanding glads of our time, a very sensational National prize winner at flower shows. It is very tall, and the large blooms are a sparkling shrimp pink. In the following list we offer Picardy, in the regular prepaid price list.

## SPECIAL OFFERS (Continued)
